Do you need a portable battery or power bank?

Watching your phone or tablet steadily run out of power when you're nowhere near an outlet is stressful. But there's an easy solution: a portable battery or power bank. They are available in many sizes and capacities and can include handy features like fast charging and multiple ports.

Which power bank should I buy?

The Nimble Champ is our top recommendation for most folks, but we have all sorts of alternatives here. Read our Best MagSafe Power Banks guide for Apple-specific portable chargers, and our Best Portable Power Stations guide if you need more power. Updated June 2025: We've added power banks from Redmagic and Statik, and added a new FAQ.

How many devices can an anker laptop power bank charge?

The Anker Laptop Power Bank features 165W output, which means it can charge bigger, more power-hungry devices like a laptop just as effortlessly as it can juice up a phone or tablet. It can charge up to four devices and even comes with built-in cables.

How much power does a power bank provide?

Most power banks are designed to provide up to 25W of power. However, smaller power banks will likely deliver less than that. We have found in our testing that an output rating of 15W-25W is the sweet spot. In that range, you will get efficient power delivery and quicker charging times on the go.

Which power bank is best for a laptop?

Its rate of power delivery is right up there with the best banks on the market, but the bank itself is fairly low to charge. Unlike many of the smaller banks on this list, the UGREEN 145W power bank is potent enough to support a laptop. It doesn't support Samsung Super Fast Charging, but it seems to thrive when

paired with Apple products.

How do power banks work?

Some power banks attach directly to smartphones via magnetic connection. These power banks are compact units that typically pack just enough power to recharge a compatible smartphone a single time. On this list, the Hinovo Magnetic Charger is a highly functional and convenient option. It essentially doubles your phone's battery — no cable required.
