

## SolarGrid Energy Solutions

# 16 8v 4-cell lithium battery pack

## Overview

---

What is a 4 cell battery pack?

Discover our range of 4 Cell (14.8V~16.8V) lithium-ion battery packs, designed to provide reliable and consistent power for your electronic devices and projects. With their compact size and high energy density, these battery packs are suitable for a wide range of applications, including RC vehicles, drones, portable electronics, and more.

What is a battery pack used for?

With their compact size and high energy density, these battery packs are suitable for a wide range of applications, including RC vehicles, drones, portable electronics, and more. We offer a variety of capacity options to cater to different power requirements.

How many cells are in a battery?

It consists of four cells connected in series, each with a nominal voltage of 4.2V. This type of battery is widely used in applications requiring high energy density and discharge rates, such as drones, RC vehicles, and other high-power electronic devices.

What battery protection circuit for drill motor 4s 40A?

Check each product page for other buying options. 4S 40A 14.8V 16.8V Li-ion Lithium Battery Protection Board PCB BMS Charger Protection Circuit for Drill Motor (4S 40A). 16.8V/3A Dual Channel V-Mount/V-Lock Battery Fast Charger, Compatible with All V-Mount Batteries and V-Mount Brick On The Market.

What is a 4S LiPo battery?

The 4S LiPo (Lithium Polymer) battery is a high-performance power source with a nominal voltage of 16.8 volts. It consists of four cells connected in series, each with a nominal voltage of 4.2V.

## Are 4S LiPo batteries good for RC?

Our selection includes 4S batteries with various mAh ratings and discharge rates to match your RC needs. With a nominal voltage of 14.8V, these batteries are designed to deliver the high-performance power required for RC aircraft, drones, and other applications. We offer 4S LiPo batteries from trusted brands known for their quality and reliability.
