

**SolarGrid Energy Solutions**

# **220V 50kWh solar power generation system**

## Overview

---

What is a 50kw solar power system?

A 50kW solar power system is a medium size commercial system suitable for those industries where per day power consumption is around 200 units. This solar system is the best way to reduce your operating cost and boost your savings. The 50kW solar system occupies 300 sq. meter shadow + gap free area for installation.

What is a 20kW solar power system?

Get Quotation – Contact Us. 20KW solar power system is great for small scale business and organizations. On grid system can generate 80 units/day or 2400 units/month as an average over the year. It requires 100 square meter + shadow gap area for installation. You will get a full ROI (return on investment) within 3 to 5 years.

What is an off grid solar power system?

Off grid solar power system doesn't connect to the power grid. In general, it includes solar panels, charger controller, batteries and inverter. This system will store the solar power into the batteries, batteries energy will be converted the electricity power to supply the appliances working through the inverter.

What are the components of a solar power system?

In general, it includes solar panels, charger controller, batteries and inverter. This system will store the solar power into the batteries, batteries energy will be converted the electricity power to supply the appliances working through the inverter. On grid solar power system connects to the power grid.

How does a solar power system work?

On grid solar power system connects to the power grid. In general, it includes solar panels, grid-connected inverter, the solar power will be converted the electricity power to appliance working directly. When the solar power is off,

the power grid will replenish the electricity power to appliances working. Charging mode, intelligent control.

How to connect 380W solar panel to h6t-360?

380W solar panel 130pcs, 13pcs connect in series, 10 groups in parallel connect to H6T-360 PV combiner (ten input one output), then connect to two solar controller, controller connect to the batteries, 200Ah 12V gel battery 90pcs, 30pcs connect in series, 3 groups in parallel, then connect to the three phase inverter.
