24 lithium battery pack container

Overview

Are lithium-ion battery storage containers safe?

Engineered to ensure secure containment and charging, these meticulously crafted lithium-ion battery storage containers provide comprehensive safeguarding, including 90-minute fire resistance against external sources.

What is lithium ion battery packaging?

The lithium ion battery packaging utilises standard footprints designed to interface with customers' existing supply chains. Once batteries are removed at the assembly line, two-unit loads can fit together and packed into one lithium battery container, to reduce return shipping costs.

What is a lithium battery shipping box?

The lithium battery shipping boxes are suitable for non-certified batteries, prototypes, battery cells, battery modules and batteries in equipment. For increased part protection, the batteries are stored in layers using customised interior packaging solutions that are developed to safely hold dangerous goods.

Do you need a shipping box for lithium batteries?

UN certified containers for transporting and storing lithium batteries are needed to comply with the regulations. ORBIS' lithium battery shipping boxes fully hold and protect the batteries from damage or shocks of any kind. That includes isolating loose cables and poles.

Can ionpak transport lithium-ion batteries safely?

The ORBIS IonPak is suitable to transport lithium-ion batteries safely. The UN approved packaging is certified for solid dangerous goods in a variety of different industries. With a robust outer packaging, customised interior packaging and dust cover, our lithium battery shipping boxes optimise product flow in industrial supply chains.

Where can I safely transport a lithium-ion battery?

Welcome to DENIOS, your premier destination for securing safe transportation and storage of lithium-ion batteries. With our range of advanced BatterySafe™ cases and aluminum containers, we prioritize the protection of your assets throughout every stage of their lifecycle.
