30kva sine wave inverter

Overview

What is a 30kVA solar inverter?

A 30kVA solar inverter is a high capacity 360V 3-phase solar inverter, powered with reliable, regulated and stabilized pure sine wave output. It is an aesthetically pleasing power converting system with over 98% maximum efficiency and is suitable for all types of home appliances and commercial establishments that require uninterrupted power supply.

What is a 3000-watt pure sine wave inverter?

A 3000-watt pure sine wave inverter is a device that converts DC current to AC current in the form of a pure sine wave, with a maximum output power of 3000 watts. It is typically used to power appliances from solar panels or batteries.

What is a sinewave inverter?

A sinewave inverter is a device that converts DC power (such as from batteries or accumulators) into alternating current (typically 220 volts 50 Hz sine or corrected). In simpler terms, it converts direct current into alternating current. Our common emergency power supply often uses a DC battery to produce 220V AC through the use of a sinewave inverter.

What are the features of T Series solar inverter?

T series 30kw~200kw three phase solar inverter feature: 1. With AC reactor (Protect against city power current shock) 2. Double protection. (Two fuses, including the city power security and battery power security) 3. Thyristor charging.

What is a wide voltage input off grid inverter?

11□Wide input voltage can be set according to customer's requirement. Input voltage range can be selected from 100-400v or 200-600v or 400-850v. This wide voltage input off grid inverter can work without battery and solar charge

controller, which save battery cost and same like with MPPT function can maximum make full use of solar power .

Are inverters IP65 & IP20 protected?

The inverter is IP65 and IP20 protected (as per the model) alongside several other protection functions that first run the load through the photo-voltaic panels and thereafter through the grid, if available.
