## Overview

---

What is a 5G cloud base station?

The 5G cloud base station for industry is based on ZTE's unique NodeEngine computing power base station solution.

What is a 5G gnodeb?

The 5G next-generation base transceiver station or gNodeB (gNB) connects subscriber user equipment (UE) devices to the mobile network. Many of the gNB throughput improvements come from multiple input and multiple output (MIMO) antenna systems that improve cellular connection reliability and quality.

How to upgrade a site to a 5G cloud base station?

Only one board needs to be added, so to upgrade the existing site into one-stop 5G cloud base station for industry. No engineering survey is required, no new equipment room space needs to be added, so the private network services can be put into operation in one hour.

What are 5G manufacturing solutions?

5G manufacturing solutions need to verify network equipment across multiple frequency bands and bandwidths, while being fast and cost effective. In addition, the test set-up also needs to remain flexible enough to address a wider variety of next generation requirements as the 3GPP standards continue to evolve.

Why did Qorvo start 5G?

Qorvo's early start in 5G comes from our legacy of R&D and product development in the defense and aerospace markets, as well as being a leading supplier of sub-6 GHz RF solutions to the world's leading 2G, 3G and 4G base station manufacturers.

## What makes a good 5G network access equipment?

New 5G network access equipment must deliver broader bandwidths, higher frequencies, lower latencies, and enable machine-to-machine communication necessary for a massively connected Internet of Things (IoT). As you bring new 5G network equipment to market, make sure you test against the most realistic 5G conditions.
