# ASEAN wind power storage and photovoltaic energy storage

## Overview

---

How successful is ASEAN in solar and wind power uptake?

Despite progress in some countries, ASEAN's success in solar and wind uptake has been mixed. Solar and wind power uptake has recently stalled in Thailand and the Philippines, the earlier pioneers in the region (International Renewable Energy Agency, 2021).

Should ASEAN deploy large-scale solar photovoltaic (PV) with battery storage?

And as solar is abundant in all AMSs, it is incumbent upon ASEAN to deploy large-scale solar photovoltaic (PV) with battery storage, which this study accordingly thoroughly analyzes, as previously mentioned.

Should ASEAN transition to solar and wind power?

Early preparation in terms of electricity transmission and distribution and also energy storage would enable ASEAN to better benefit from transitioning to intermittent but increasingly cost-effective sources of electricity in the form of solar and wind power. There is a sizeable literature on solar and wind development policies.

How much solar & wind will ASEAN have in 2050?

ASEAN countries are seeing increasing solar and wind generation as they shift towards clean power, but to get on track with the IEA's 2050 net zero scenario, 164 GW of solar and 65 GW of wind need to be installed by 2030.

Should ASEAN invest in solar & wind power?

Investments in solar and wind power also reduce the stranded asset risks associated with fossil fuel assets. It has been estimated that ASEAN could save about US\$26 billion on fuel costs by achieving its 23% renewable energy target by 2025 (ASEAN Centre for Energy, 2020).

Which country has the most solar power in the ASEAN region?

Since 2019, Vietnam has emerged as the leader in solar and wind electricity adoption in the ASEAN area. The country overtook Thailand and had the largest installed solar and wind capacity in 2019. Vietnam's total capacity of solar photovoltaic (PV) reached about 16,500 megawatts (MW) by the end of 2020 (International Renewable Energy Agency, 2021).
