Albania Energy Storage Period Inspection

Overview

What is the situation in the development of the energy sector in Albania?

The situation in the development of the energy sector in Albania 2.1. Electricity production for 2023 8,796 GWh of electricity, almost 11% more than the energy consumption. increase in production by 25.6% compared to 2022, where it was 7,003 GWh.

Why does Albania need to import energy?

Changing weather patterns over the years have forced the country to import energy to cover domestic needs, as a lack of storage capacity requires Albania to sell its generated power during peak months of production.

How many EIA processes were conducted in Albania?

Albania reported that over 100 EIA processes related to energy projects were conducted in the reporting period. Concerns persist regarding the hydropower projects on the Vjosa River, Valbona River, and the Skavica project.

How many private energy companies are in Albania?

Currently, the number of private Albanian companies that have become part of the Albanian Electricity Stock Exchange has reached 12. Meanwhile, together with the 5 Albanian public energy companies, which were the first to join, the total number of entities goes to 17.

How can Albania solve the energy crisis?

In addition to eliminating the electricity deficit and taking electrification to new sectors, Albania can increase its potential to unlock new industries and investment using clean energy. The country can explore opportunities to produce green hydrogen through solar and wind power.

Does Albania have a net metering system?

There is a net metering in place, enabling consumers to operate renewable energy installations with a maximum capacity of 500 kW. Albania has incorporated changes into the Renewables Law, which outlines a transition to net billing for self-consumed renewables, scheduled to commence on 1 January 2024.
