Algeria exports energy storage cabinets

Overview

How much natural gas did Algeria export in 2023?

According to the Energy Institute's 2024 Statistical Review of World Energy, Algeria exported about 1.9 Tcf of natural gas in 2023, most of which went to Europe. About 672 Bcf of natural gas was exported as LNG, and the remaining 1.2 Tcf was shipped via pipeline (Figure 13).²¹

What petroleum products does Algeria import?

Nearly all of Algeria's petroleum product exports over this period (96%) were fuel oil, liquefied petroleum gas, and naphtha. Algeria imported an average of about 32,000 b/d of petroleum products during the same period, primarily bitumen and biodiesel (Figure 10 and Figure 11).¹⁵

Does Algeria have enough electricity?

Algeria has enough electricity supply to meet its domestic consumption, given its substantial natural gas reserves and the predominant use of natural gas in power generation. Algeria's electricity exports are limited by its electric transmission capacity.

How much oil does Algeria export?

According to the latest estimates by EIA and Global Trade Tracker, Algeria exported an average of 532,000 b/d of crude oil between 2015 and 2024. Crude oil exports declined about 196,000 b/d over the 10-year period as a result of Algeria's declining crude oil production.

How much natural gas is consumed in Algeria?

Dry natural gas production in Algeria averaged about 3.3 trillion cubic feet (Tcf) between 2014 and 2023, and dry natural gas consumption averaged 1.6 Tcf over the same time period. In 2020, both natural gas production and consumption fell as the COVID-19 pandemic limited mobility and economic activity in the country.

How much oil did Algeria export in 2024?

Crude oil exports declined about 196,000 b/d over the 10-year period as a result of Algeria's declining crude oil production. In 2024, Algeria exported about 402,000 b/d of crude oil and condensate; Europe received most of those exports by volume (295,000 b/d) for the year.
