# **Amsterdam outdoor power supply size standard**

## Overview

---

Do I need a power adapter in Netherlands?

Netherlands uses power plugs and sockets of Type C and Type F, with a standard voltage of 230 V and a frequency of 50 Hz. If your devices are compatible with these specifications, you will not need a power adapter.

What type of power socket is used in the Netherlands?

The power sockets in the Netherlands are of type C and F. The standard voltage is 230 V at a frequency of 50 Hz. Check your need for a power plug (travel) adapter in the Netherlands.

What is the standard voltage for a power socket in Amsterdam?

All power sockets in Amsterdam provide a standard voltage of 230V with a standard frequency of 50Hz. You can use all your equipment in Amsterdam if the outlet voltage in your own country is between 220V-240V. This is the case in most of Europe, Australia, the United Kingdom and most countries in Africa and Asia.

Which power plugs are compatible in the Netherlands?

Select your country of residence, to check the compatibility of your power plugs in the Netherlands. In the Netherlands, power plugs and sockets (outlets) of type C and type F are used. The standard voltage is 230 V at a frequency of 50 Hz.

Which electrical outlets are compatible with Amsterdam's power grid?

Focusing on these two dominant types will ensure compatibility with almost all electrical outlets you encounter in Amsterdam. Amsterdam's standard voltage is 230V, with a frequency of 50Hz. These specifications are crucial when determining whether your electronics are compatible with the Dutch power grid.

What is the standard voltage in Amsterdam?

Amsterdam's standard voltage is 230V, with a frequency of 50Hz. These specifications are crucial when determining whether your electronics are compatible with the Dutch power grid. Using devices designed for a different voltage can result in severe damage, malfunction, or even pose a fire hazard.
