Bahrain Wind and Solar Energy Storage Project

Overview

Is Bahrain transitioning to solar energy projects?

After the establishment of the Sustainable Energy Unit (SEU) in Bahrain in 2014, a radical transition toward launching solar energy projects can clearly be observed. The SEU was established in collaboration between the national government and the United Nations Development Program (UNDP).

How many megawatts will Bahrain produce by 2025?

Bahrain will have to produce 280 megawatts of electricity from renewables by 2025, increasing to 710 megawatts by 2035, to meet the country's renewable energy targets.

What is Bahrain's Vision 2030?

Bahrain's Vision 2030 outlines measures to protect the natural environment, reduce carbon emissions, minimize pollution, and promote sustainable energy. Bahrain is committed to designing energy efficiency policies and promoting renewable energy technologies that support Bahrain's long-term climate action and environmental protection ambitions.

Can 'district cooling' improve the efficiency of air conditioning in Bahrain?

As a result, Bahrain is looking to utilize the practice of "district cooling" to increase the efficiency of air conditioning by as much as 50 percent. Bahrain generates approximately 2.6 kg of solid waste per person per day.
