

## SolarGrid Energy Solutions

# Bangladesh rooftop photovoltaic energy storage

*LiFePO<sub>4</sub> Battery, safety*

*Wide temperature: -20~55°C*

*Modular design, easy to expand*

*The heating function is optional*

*Intelligent BMS*

*Cycle Life: ≥ 6000*

*Warranty: 10 years*

## Overview

---

Bangladesh has implemented a new regulation requiring new buildings with a roof area of more than 92.2 square metres to install a net-metered solar system as a prerequisite for grid connection. Will new rooftop solar capacity save the Bangladesh Power Development Board?

New rooftop solar capacity of 2,000MW could save the Bangladesh Power Development Board between Tk52.3billion (US\$476 million) and Tk110.32 billion (US\$1 billion) a year. Awareness raising, capacity development of stakeholders and quality assurance of accessories will help build trust in rooftop solar.

How much does rooftop solar cost in Bangladesh?

The levelised cost of energy (LCOE) from rooftop solar stands at Bangladeshi Taka (Tk) 5/kilowatt hour (kWh) (US\$0.046/kWh) against the electricity tariffs of Tk9.9/kWh (US\$0.09/kWh) and Tk10.55 (US\$0.096/kWh) for industrial and commercial buildings, respectively.

Where is the largest rooftop solar plant in Bangladesh?

Solaric, a leading solar company in Bangladesh, is on its way to installing the largest rooftop solar plant completely. It is being installed in a privately owned Korean Export Processing Zone (EPZ) in Anwara Upazila of Chattogram.

Could rooftop solar be a missed opportunity in Bangladesh?

Bangladesh must tap the low-hanging fruit of rooftop solar to stave off the energy sector challenges and reduce colossal imports of fossil fuels. The delay in steering the sector in the right direction could result in a missed opportunity.

Does Bangladesh Bank refinance rooftop solar projects?

While Bangladesh Bank's green refinancing scheme is the least-cost financing vehicle, all eligible rooftop solar projects will not receive the refinance due to

its limited funds of Tk4 billion (US\$36.4 million) and the competition with 69 other environment-friendly projects.

Can rooftop solar power save BPDB money?

We estimate that adding 2,000MW of rooftop solar capacity could help the BPDB save between Tk52.3 billion (US\$476 million) and Tk110.32 billion (US\$1 billion) a year by reducing generation and purchase of costly power. There have been some encouraging signs recently.
