Base station power construction plan in winter and rainy season

Our Lifepo4 batteries can beconnected in parallels and in series for larger capacity and voltage.

Overview

Are rainy days a hindrance to construction projects?

Likewise, rainy days are not just a hindrance to our plans; they can actively delay construction projects and hemorrhage companies' money. As the rainy season alternates between geography across the US, construction zones need to be mindful of the added risks that rain and extreme weather events present to construction zones.

How does weather affect construction planning?

Construction planning isn't just affected by snow and ice, but also the rain, high winds, and risks of tornadoes that the spring season brings. Construction firms must carefully consider how to manage risks associated with adverse weather conditions to keep their projects moving through the spring and into summer.

How does the rainy season affect construction zones?

In turn, the extreme rainy season can lead to structural damage, costly delays, and crew injuries that increase costs and liabilities. That's why we've outlined ten concrete steps to help companies manage their construction zones during the rainy season, so they are better prepared.

Should you negotiate a construction contract if it rains?

If you're tied to a current contract and about to enter the rainy season, consider finding ways to negotiate the contract. Even if you have to eat some of the costs of delaying a project by a few weeks, ensuring that the project is built fully to spec will be worth it.

Can construction planning be affected by snow and ice?

Although the harsh winter months are finally behind us, those of us in the construction and engineering industries aren't exactly sitting back without a care in the world. Construction planning isn't just affected by snow and ice,

but also the rain, high winds, and risks of tornadoes that the spring season brings.

Should you invest in a construction weather forecasting service?

It's a smart idea to invest in a construction weather forecasting service to warn you about bad weather that's coming and plan ahead for potential delays. Not only are delays a concern, but also the health and safety of your crew on the ground.
