Where can I install a 93pm integrated battery cabinet?

Eaton 93PM Integrated Battery Cabinet-Small Welded Line-up-and-match battery cabinets are installed adjacent to the UPS. The IBC-SW can be installed on either the left or right side or on both sides of the UPS cabinet (see Figure 2). Figure 2. Eaton 93PM UPS and Two 93PM IBC-SWs — Various Configurations.

What temperature is the battery cabinet rated for?

The battery cabinet is rated for operation in up to a 40°C (104°F) ambient temperature. The batteries are rated for a 25°C (77°F) ambient temperature to extend their useful life. It is recommended for optimal battery life and discharge performance to keep the ambient air temperature the battery is used in at 25°C (77°F).

How do you wire a battery cabinet?

Secure the battery wiring to the wire tie anchors (see Figure 24) using Zip ties. Route the battery cabinet ground wiring from the UPS through the bottom side inter-cabinet access pass-through (see 4.4.1 Line-Up-and-Match Power Wiring) of the UPS cabinet and IBC-SW to the IBC-SW ground terminal block.

Where is the UPS battery cabinet located?

The battery cabinet may be located to either the right or left of the UPS cabinet. This procedure assumes the battery cabinet is located to the right of the UPS cabinet. 14. If line-up-and-match installation, remove the rectangular and circular knockout on the bottom and top front side of the UPS and the IBC-SW (see Figure 9). 15.

How do I connect a battery cabinet to a ups?

Route the battery cabinet ground wiring from the UPS through the top of the IBC-SW to the wiring channel on the left side of the IBC-SW (see Figure 22).

Route the wiring along the wiring channel to the IBC-SW ground terminal block. See Figure 23 for terminal location.

Can a battery cabinet void a warranty?

Failure to follow guidelines may void your warranty. The battery cabinet is rated for operation in up to a 40°C (104°F) ambient temperature. The batteries are rated for a 25°C (77°F) ambient temperature to extend their useful life.
