# **Battery pack lightweight**

## Overview

---

Our guide provides a curated list of the best lightweight power bank picks and also outlines the essential factors to help you choose wisely, ensuring you always stay connected without the bulk. What is the best portable battery pack for campers & backpackers?

After poring over dozens of spec sheets, performing discharge tests, and using five lightweight power packs for over a month, we think the Anker Astro E1 6700 is the best portable battery pack for most campers and backpackers, particularly weekend warriors.

What is the smallest and lightest battery pack?

At 6700 mAh capacity (4,121 mAh based on our discharge test) and only one output port, the Astro is a rather minimalist battery pack when it comes down to it. Yet that is what makes it great for our purposes. At 4.3 oz, It is one of the smallest and lightest battery packs for its capacity.

How to choose a backpacking battery pack?

For the most part, choosing a backpacking battery pack is as simple as cross referencing trip duration with power needs. Most people should choose a battery with ~5,000 mAh for day trips and overnights, where all you really need is one phone recharge, or half a phone charge plus topping off smaller devices.

Which battery pack should I buy?

If you want one battery pack that you can use on the trail and in your daily life, we recommend the Bolt. When deciding which battery packs to test, we combed through plenty of spec sheets and product pages, paying special attention to price, weight, and stated capacity.

What is the best battery capacity for a lightweight power bank?

The best capacity for a lightweight power bank typically ranges between

5,000 to 10,000mAh. This capacity range provides a balance between portability and the ability to charge most smartphones at least one to two times, making it an ideal choice for everyday use without adding significant weight to your carry.

Is the bolt a good battery pack?

For the backpacker who only needs to charge their phone, and prefers to pack a good headlamp or flashlight, the Bolt is overbuilt. I'll finish by saying that towards the end of my month of using these five battery packs in daily life the Bolt became the one I used almost exclusively.
