Beiya small cylindrical lithium iron phosphate battery

Overview

What are lithium iron phosphate (LiFePO4) batteries?

Lithium iron phosphate (LiFePO4) batteries are known for their high safety, long cycle life, and excellent thermal stability. They come in three main cell types: cylindrical, prismatic, and pouch. Each of these types has distinct characteristics that make them suitable for various applications.

What are the different types of lithium phosphate batteries?

1. Cylindrical LiFePO4 Cells Cylindrical LiFePO4 cells are the most commonly used type of lithium iron phosphate batteries. They resemble the shape of traditional AA or AAA batteries and are widely employed in applications where high power and durability are essential.

What is a BYD blade battery?

This year's particularly hot BYD blade battery is the lithium iron phosphate battery. The basic production process of lithium iron phosphate mainly includes the production of iron phosphate precursor, wet ball milling, spray drying, and sintering.

What is a cylindrical lithium ion battery?

Cylindrical cells one of the most widely used lithium ion battery shapes due to ease to use and good mechanical stability. The tubular cylindrical shape can withstand high internal pressures without collapsing. Melasta produces multiple sizes and capacities according to the customer requirement.

Who makes LiFePO4 batteries in China?

Melasta is one of the main producer and supplier for LiFePO4 batteries in China. Our batteries have the features due to our superior technologies and state of the art manufacturing facilities and investment on research and development. 1. Very long cycle life.

Why should you choose a cylindrical LiFePO4 battery?

High Safety: Compared to other lithium-ion batteries, cylindrical LiFePO4 cells are less prone to overheating or catching fire. **Low Maintenance:** They require minimal upkeep and do not need balancing or calibration. **Cylindrical LiFePO4 cells are versatile and can be found in:** **Voltage:** Ensure compatibility with your device's voltage requirements.
