

SolarGrid Energy Solutions

Boston lithium battery pack factory

Overview

Boston-based Pure Lithium is building a pilot plant for a new kind of lithium metal battery, one it claims could outperform today's lithium-ion cells, and, crucially, be built entirely without Chinese inputs. Where are lithium-ion batteries made?

Currently, nearly all lithium-ion batteries in the world are manufactured in Asia. The Commonwealth will offer up to \$9 million in matching financing to support the company's planned manufacturing operation in Auburn. Boston-Power selected the Auburn site based on proximity to its headquarters.

Who is pure lithium?

About Pure Lithium Pure Lithium is a disruptive Boston-based lithium metal battery technology company led by its founders, inventor and lithium expert, CEO Emilie Bodoin, and world-renowned battery and metallurgical expert, MIT Emeritus Professor Donald R. Sadoway, as full-time CSO.

Will pure lithium replace lithium-ion batteries?

The company has developed a lithium metal battery that chief executive Emilie Bodoin says will displace lithium-ion batteries. Pure Lithium has spent the last four years doing research and development on the technology, which could be used in electric vehicles, utility-scale energy storage, and other applications.

Could a new lithium battery outperform today's lithium-ion cells?

Boston-based Pure Lithium is building a pilot plant for a new kind of lithium metal battery, one it claims could outperform today's lithium-ion cells, and, crucially, be built entirely without Chinese inputs.

Who backed pure lithium?

Pure Lithium's financial backing includes significant investments from Oxy Low Carbon Ventures (OLCV), which led their Series A funding with \$15 million,

potentially extending to \$30 million. Energy Capital Group (ECG) has also invested in the company, with board member Robert Friedland leading the fundraising efforts.

Where is the world's most advanced battery manufacturing facility located?

Boston-Power, Inc. announced that the company is working to build what it describes as one of the world's most advanced battery manufacturing facilities in Auburn, Massachusetts.
