

SolarGrid Energy Solutions

Botswana Lian New Energy Gas Station Site

Overview

How will electricity be generated in Botswana?

Electricity will be generated on site and sold into the national power grid in Botswana. Power will be sold to Botswana Power Corporation (BPC) under an agreed 10MW Power Purchase Agreement (PPA). Access to the grid is available at the Lesedi project via a 66kV transmission line capable of carrying up to 25MW of power.

What is the power sector in Botswana?

Revised in April 2025, this map provides a detailed view of the power sector in Botswana. The locations of power generation facilities that are operating, under construction or planned are shown by type – including liquid fuels, gas and liquid fuels, coal, hybrid, hydroelectricity and solar.

Who is Botala energy?

Botala Energy has established itself as a first mover in Botswana's emerging coal bed methane (CBM) industry. Botala has transformed its Serowe CBM Project from an exploration asset to a commercially viable and development-ready CBM Project, significantly derisking the asset and paving the way for production.

What is Botala energy's Serowe CBM project?

Through its Serowe CBM Project, Botala Energy is looking to enable a successful, secure and sustainable future through the production of LNG, establishment of solar energy hubs and downstream power generation. Botala Energy has established itself as a first mover in Botswana's emerging coal bed methane (CBM) industry.

Is Botala a bankable CBM developer in Botswana?

Initiation of a Bankable Feasibility Study. Botala is positioned as a leading CBM developer in Botswana, at a stage comparable to the Queensland CBM

industry 15 years ago.

How has Botla transformed its Serowe CBM project?

Botla has transformed its Serowe CBM Project from an exploration asset to a commercially viable and development-ready CBM Project, significantly derisking the asset and paving the way for production. Having completed significant milestones including:
