Overview

Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.

Will energy storage capacity reserve auction work in Brazil?

While Brazil wastes billions of real on curtailment, the electricity sector is demanding urgent action on an energy storage capacity reserve auction which is now not expected until 2026. 'What is missing is the courage to unlock the market,' said Greener CEO Marcio Takata.

Will Brazil's first electricity auction drive \$450m investment?

Brazil is set to conduct its first auction for adding batteries and storage systems to the national power grid, as reported by Reuters. The auction, to take place in June 2025, will include 300MW energy capacity purchase that could drive an estimated \$450m in investments from winning bidders, according to consultants Oliver Wyman.

Should Brazil invest in energy storage?

Brazil's energy storage sector must attract R47 billion (\$7 billion) in investments by 2030, according to the Brazilian Energy Storage Solutions Association (Absae). Stakeholders are in the process of creating a regulatory framework for energy storage.

How much solar power will Brazil have in 2029?

Brazil's installed solar capacity is expected to rise from 51.7 GW in December 2024 to 88.2 GW by the end of 2029, according to the national grid operator's 2025-29 Energy Operation Plan.

Could floating solar power power Brazil?

Floating solar could add 17 GW to 24 GW of capacity in Brazil, depending on pricing scenarios, while also reducing water evaporation by up to 50% and conserving water for hydroelectric generation, according to a new study. News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.
