Brazil Sao Paulo large monomer for outdoor power supply

Overview

How will Brazil's growth in power generation impact corporate ratings?

Fitch Ratings-Rio de Janeiro/Sao Paulo-05 February 2025: The pace of growth in power generation capacity in Brazil, significantly surpassing demand and primarily focused on solar sources, is increasing curtailment and its impact on cash flows of power producers, according to Fitch Ratings. However, corporate ratings have not been affected.

Why does Brazil need a hydro power plant?

Brazil has a massive portfolio of hydro assets and the natural resources to enable the exploration of hydro power plants, but recent water crises and climate change have shown how dependent Brazil is on hydro. When reservoirs and rivers are not sufficient to generate enough power to meet market demands, this can create issues in energy supply.

What are the laws governing the power market in Brazil?

The federal government has passed the following laws, which represent the main legal framework for the power market in Brazil: (i) Law No. 8,987/95 (Public Concessions Law); (ii) Law No. 9,074/95 (Power Concessions Law); (iii) Law No. 9,427/96 (Creation of ANEEL); (iv) Law No. 10,848/04 (Power Trading), amongst others.

Is biomass a major source of power in Brazil?

Biomass is currently the fourth main source of power generation in Brazil. It reached over 600 operational biomass power plants in mid-2022, representing more than 16 GW in authorized capacity. Brazil's strong sugar cane industry, one of the main sources of biomass to the power sector, is also expected to see significant growth in the next years.

Can foreigners invest in renewables companies in Brazil?

Renewables companies that participate in the Brazilian power sector must be

located in Brazil and incorporated under Brazilian laws. However, there are no restrictions regarding foreign participation in renewables companies, nor on any sort of foreign investments in renewables.

How many power plants are there in Brazil?

According to ANEEL, Brazil has over 17,000 operational power plants, with more than 183 GW in authorized capacity. When considering projects under development and construction, Brazil reaches the figure of over 270 GW in authorized capacity, generated by almost 20,000 power plants. 1
