Britain s communication base station construction efforts

Overview

The more our lives are conducted online, the more access to the internet becomes critical for social and economic opportunity. This is why delivering world-class digital infrastructure to all Britons is.

Where can I find a report on the UK's communications infrastructure?

Older reports are available on the National Archives website. See also. Reports on the UK's communications infrastructure, focusing on coverage and performance of fixed broadband and mobile networks.

What are the rules for building telecommunications infrastructure?

This briefing paper explains the rules for building telecommunications infrastructure such as 5G mobile masts, including planning rules and the Electronic Communications Code. Ensuring the wide availability of high-speed broadband and mobile connectivity is a central part of the government's National Infrastructure Strategy and levelling up agenda.

What reforms have been made to telecoms infrastructure?

The Library briefing on the Product Security and Telecommunications Infrastructure Act covers the reforms in detail. The ECC gives telecoms operators a general right to conduct street works. Street works are a significant element of telecoms infrastructure builds, especially broadband.

How does telecommunications work in the UK?

Telecommunications is a reserved power, meaning that overall policies and targets are set by the UK Government. Some aspects of infrastructure building, such as planning and building regulations, are devolved responsibilities and vary slightly in each nation. Others, such as the rules on access agreements, apply UK-wide.

Who rolled out broadband and mobile telecommunications networks in the UK?

Broadband and mobile telecommunications networks in the UK are rolled out

by private companies, here referred to as “operators”. Telecoms operators take decisions about where and when to roll-out infrastructure based on commercial considerations.
