

SolarGrid Energy Solutions

British base station power distribution cabinet bidding

Higher Anti-Rust Performance
Lower Internal Impedance

Sturdy Handle

Insulating Cap

ABS Case

M8 Terminal

Overview

You can find and apply for other contracts with the public sector, for example lower value contracts, using other procurement services.

What is a pre gate closure BM unit transaction (PGBT)?

There is a special kind of contract called a Pre- Gate Closure BM Unit Transaction (PGBT) which provides electricity in a profiled way across the Settlement Period (i.e. specifying the volumes it wants on a minute by minute basis across the Settlement Period). For more details see the NGESO website. The above are for system balancing purposes.

How does the British transmission network import and export electricity?

The British Transmission Network can also import and export electricity from and to other countries through dedicated lines called Interconnectors. There are currently four Interconnectors: France to Great Britain, Northern Ireland to Great Britain, the Republic of Ireland to Great Britain and Holland to Great Britain.

What is bid / offer data?

Bid/ Offer Data is a set of prices and volumes, sometimes referred to as a Bid/ Offer ladder. Balancing Services: This includes Reactive Power, Short term operating reserve, Frequency Response, Black Start and Reserve Services. In most cases, the System Operator will contract for these in advance, by dealing directly with the Party.

What is a bid & offer?

These are called Bids and Offers. A Bid is a proposal to reduce generation or increase demand. The Electricity System Operator will, in real-time, and as required, match supply and demand in each half hour by accepting Bids or Offers depending on whether they need to increase or reduce electricity generation to meet demand.

How many distribution networks are there in Great Britain?

The Distribution Network is split into 14 areas within Great Britain, which correspond to discrete geographical areas (see diagram below). Although each Distribution Network is a separate geographical area, they aren't separate electrical systems.
