

## SolarGrid Energy Solutions

# Bulgaria wind solar and storage integration

## Overview

---

Reports now indicate a 35 GW pipeline of solar and wind projects requesting connection to Bulgaria's grid<sup>4</sup>, while according to data by the Association for Production, Storage, and Trading of Electricity (APSTE), over the last three-years Bulgaria has practically doubled its PV installed capacity to 2.2 GW with another 700 MW expected to become operational in 2023. Why is energy storage growing in Bulgaria?

Energy storage in Bulgaria is expanding rapidly as the government awards nearly 10 GWh of capacity to 82 projects, boosting renewable energy reliability and grid stability.

Is Bulgaria moving towards a greener energy future?

Bulgaria is taking bold steps toward a greener energy future, having recently wrapped up its most ambitious energy storage tender to date.

What does Bulgaria's surge in storage capacity mean for Europe?

As Europe races toward climate neutrality, Bulgaria's surge in storage capacity signals a shift not only in national priorities but also in regional energy dynamics.

What is the biggest solar project in Bulgaria?

The Renalfa IPP project in Razlog has been claimed as the biggest project of its type in Bulgaria. It is also larger than the biggest project to come online so far in neighbouring Romania, a 6MW/24MWh BESS in that country's Constanta County, co-located with solar PV and wind generation plants.

How big is Bulgaria's solar PV capacity in 2024?

At the close of 2024, Bulgaria's solar PV capacity had already reached 3.91 GW—an annual increase of over 1 GW. These developments come on the heels of Bulgaria's first renewable energy auction held in late 2024, where more than 3 GW of generation and 1.176 GW of storage capacity were

secured.

How will the selected storage systems be distributed in Bulgaria?

The selected storage systems will be geographically distributed across Bulgaria and connected either to the national transmission grid or local distribution networks. All awarded projects must be operational by March 2026.

## Bulgaria wind solar and storage integration

---

### Bulgaria begins tendering for 1.4GW renewables, ...

Mar 19, 2024 · Karad, an existing solar PV project in Bulgaria. Image: RP Global. Bulgaria's Ministry of Energy has launched two tenders to add 1,425MW of
