Can I use it when charging with an outdoor power supply

Overview

Can You charge a portable power station while using it?

Yes, you can charge a portable power station while using it, a process known as pass-through charging. This feature allows you to simultaneously power devices and recharge the station, making it highly convenient for continuous use, although it may impact the charging efficiency and overall battery lifespan.

How do you charge a power station with a car?

Detailed instructions for charging your power station with a car are as follows:
Connect to Power Station: Insert the car charging cable into the power station's charging input and the car's 12V outlet. Start Engine: Turn on your car's engine to start charging; this prevents draining the car's battery.

How to charge a portable power station using solar panels?

Below are how to charge a portable power station using solar panels: Prepare Solar Panels: Ensure you have compatible solar panels and the necessary connectors. Position Panels: Place the solar panels in direct sunlight for maximum efficiency. Connect to Power Station: Connect the panels to the power station's solar input port.

How to charge a portable power station using a generator?

Here is how to charge your portable power station using a generator: Connect to Generator: Use the charging cable to connect the power station's AC input to the generator's AC output. Start Generator: Power on the generator to start charging. Make sure it operates in a well-ventilated area to avoid the buildup of exhaust fumes.

How do I recharge my portable solar power station?

Another great way to recharge your portable solar power station is by using your car as a source of power. It's great for short trips like camping or hiking

where you may not have access to an AC wall outlet but still need some electricity for your devices.

Can Jackery power stations be used while charging?

Most of Jackery's power stations can be used while they are charging, no matter how they're being charged. If you have a model that can't be used while it's charging, you can still try without damaging anything. If the battery is being charged at a higher rate than what is being used, the battery percentage will not be going down.
