

## SolarGrid Energy Solutions

# Can eg8010 be used as a high frequency inverter

## Overview

---

What is eg8010 power converter?

It applies to DC-DC-AC two stage power converter system or DC-AC single stage low power frequency transformer system for boosting. EG8010 can achieve 50/60Hz pure sine wave with high accuracy, low harmonic and distortion by external 12MHz crystal oscillator.

What is the EG8010?

The EG8010 is a DC-DC-AC two stage power converter system or DC-AC single stage low power frequency transformer system for boosting. It can achieve 50/60Hz pure sine wave with high accuracy, low harmonic and distortion using an external 12MHz crystal oscillator.

What is the EG8010 an ASIC for?

The EG8010 is an ASIC (Application Specific Integrated Circuit) for digital pure sine wave inverters with complete function of built-in dead time control. It applies to DC-DC-AC two stage power converter systems or DC-AC single stage low power frequency transformer systems for boosting.

What is eg8010 lqfq32?

Package: LQFQ32 Type Manufacturer: EG Microelectronics Image : The EG8010 is a digital pure sine wave inverter ASIC (Application Specific Integrated Circuit ) with complete function of built-in dead time control. It applies to DC-DC-AC two stage power converter system or DC-AC single stage low power frequency transformer system for boosting.

What is the EG8010 CMOS IC?

The EG8010 is a CMOS IC that integrates a SPWM sinusoid generator, dead time control circuit, range divider, soft start circuit, circuit protection, RS232 serial communication, and a 12832 serial LCD unit, among other features. It achieves 50/60Hz pure sine wave with high accuracy, low harmonic and

distortion using an external 12MHz crystal oscillator.

How does eg8010+ir2110s sinusoid inverter work?

EG8010+IR2110S Sinusoid inverter (low power frequency transformer) T1 needs to use low power frequency transformer. Transformer filters PWM high frequency signal by connecting its secondary turns to a 2.2uF/400V capacitor of CBB. After filtering, it outputs 50Hz/60Hz sinusoid.

## Can eg8010 be used as a high frequency inverter
