

## SolarGrid Energy Solutions

# Canberra 12v400ah energy storage battery

### BASIC APPLICATION

Storage systems have been proven to be "extremely lucrative" for commercial and industrial (C&I) facilities.

## Overview

---

### What is the Big Canberra battery?

The Big Canberra Battery has inched a step closer to being built, with the ACT government announcing it will partner with Eku Energy to deliver the mass-energy storage device. Eku Energy will design, build, run, and ultimately own the 250-megawatt battery, which will be located at Williamsdale, south of the Tuggeranong town centre.

### Will Canberra's big battery power a third of Canberra?

The ACT government announces it's partnering with Eku Energy to deliver the much-hyped Big Canberra Battery which could power one-third of Canberra for two hours.

### How will Canberra's new battery storage system work?

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. This is enough energy to power one-third of Canberra for two hours during peak demand periods. Behind-the-meter batteries will be installed to help power essential services across nine government sites.

### Will the Big Canberra battery have more capacity than Hornsdale?

The Big Canberra Battery will have more capacity than South Australia's 150 megawatt Hornsdale battery. (ABC News: Lincoln Rothall) The Big Canberra Battery has inched a step closer to being built, with the ACT government announcing it will partner with Eku Energy to deliver the mass-energy storage device.

### Why is the Big Canberra battery project important?

This energy can be saved to use when the sun isn't shining, reducing the site's electricity bills. The Big Canberra Battery project will support a more reliable electricity supply for the ACT. Energy demand can rise and fall throughout the

day. Having access to stored electricity can help during peak times.

What does the Big Canberra battery mean for EKU energy?

The Big Canberra Battery represents a significant milestone for Eku Energy as we celebrate our first GWh of battery energy storage in delivery in Australia. This brings our global portfolio of battery energy storage assets to over 4GWh.
