

## SolarGrid Energy Solutions

# China all in one solar system in Germany

## Overview

---

Which European countries have the most solar power?

In the view of Qu Shuaiyuan, CEO of the Beny New Energy GmbH headquartered in China, a number of European countries like Germany, France and Spain are blessed with plenty of sunshine and have huge demands and potential for solar power utilization given the large number of single-family houses in these countries.

How did Germany influence China's solar industry?

Events in Germany triggered the entry of private local and international firms into the Chinese solar manufacturing sector, which sought to satiate Germany's demand. As a result of this increasing demand China's manufacturing capacity grew.

Is cooperation between Chinese and European solar industry a 'win-win' situation?

Cooperation between Chinese and European solar industries is a "win-win" situation, said experts and business representatives from the photovoltaic (PV) industry during the recently concluded Intersolar Europe exhibition, the largest and most influential PV industry event in Europe.

How did China become a leader in solar PV?

Beginning in the late 1990's the story of China's rise to dominance in the solar PV market began with modest rural electrification programs. This soon changed. Political developments in Germany, particularly the Green Party's governmental debut in 1998, created government driven demand for renewables.

Which countries import solar panels?

Last year, Germany imported solar cells, solar modules and other equipment for the solar industry worth around EUR 3.6 billion (USD 3.84bn) with imports

from China accounting for just over EUR 3.1 billion of the total. The second most important country of origin was the Netherlands with imports worth only EUR 143 million.

Which country imports the most solar power equipment in 2022?

The value of the imports of solar power equipment in Germany in 2022 was more than twice as high as the value of the exports from the country. Exports of solar cells, solar modules and the like amounted to EUR 1.4 billion with Austria being the largest market with a share of 14% followed by the Netherlands and Italy each with 11%.
