Co-build 5g base stations with Hetong Communications

Overview

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

What is the automatic data configuration model of 5G co-construction and shared base stations?

This paper focuses on the automatic data configuration model of 5G co-construction and shared base stations. By interacting with the core network and wireless network, this model can identify and match different 5G network modes such as SA and NSA (including dual-anchor scenarios and single-anchor scenarios).

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

Will China accelerate 5G development?

Their comments came after the top industry regulator said that China will accelerate the construction of 5G networks, expand the application of 5G technology in more fields, especially in manufacturing, and promote the research and development of 6G. "Currently, China is at the global forefront of 5G development.

How will 5G commercialization impact the information and communications industry?

Commercial use of 5G will significantly promote the information and communications industry on a new growth track. 5G commercialization will drive telecom operators to enter a new cycle of investment in mobile communication networks. Meanwhile, 5G will increase the investment demand for "new infrastructure".
