

SolarGrid Energy Solutions

Compact power station factory in Calcutta

Overview

Why should you choose compact substation solutions in India?

Our compact substation solutions offer numerous advantages, including lower installation and maintenance costs, reduced footprint, and improved safety. Our compact substation price in India is highly competitive, and we are committed to delivering high-quality products and exceptional customer service.

What are the different types of compact substations?

Our product range includes 11kV and 33kV compact substations, as well as ABB compact substations, which are available in our ABB compact substation catalog. We also offer compact package substations and compact secondary substations to cater to the diverse needs of our customers.

Which is the youngest power plant in India?

Out of these three power plants, the 750 MW Budge Budge Generating Station is the youngest (1997). The other two power plants are the 240 MW Titagarh Generating Station (1982) and the 135 MW Southern Generating Station (1990). All power plants are based on pulverised coal fired boilers and steam driven turbogenerators.

When was the first thermal power generating station built?

The first thermal power generating station of 15 MW capacity was erected in Cossipore in North Kolkata on the 20th July, 1912. Two more 6 MW sets were added in 1912 and another 15 MW set was added in 1925. Further augmentation continued till 1932 when the installed capacity of Cossipore Generating Station totalled to 96 MW.

How many MW is Titagarh thermal power station?

Subsequently, the company constructed a 240 MW thermal power station at Titagarh in the northern suburbs of Kolkata. The plant has four 60 MW sets

commissioned between 1983 and 1985.

Which power plants are based on pulverised coal fired boilers?

All power plants are based on pulverised coal fired boilers and steam driven turbogenerators. The first thermal power generating station of 15 MW capacity was erected in Cossipore in North Kolkata on the 20th July, 1912. Two more 6 MW sets were added in 1912 and another 15 MW set was added in 1925.
