Compact power station factory in Senegal

Overview

What is a gas-ready power plant in Senegal?

This 135 MW gas-ready power plant project, structured as a 20-year BOOT (Build-Own-Operate-Transfer) contract with the national utility Senelec, exemplifies advanced energy solutions in Senegal. The plant features seven Wartsila gas-ready 18V50 engines integrated with a steam turbine, enhancing efficiency and future fuel flexibility.

What is Senegal's 125 MW coal-fired power station?

Senegal's Sendou coal-fired power station, with a capacity of 125 MW, has surpassed heavy fuel oil generators as the country's most cost-effective source of baseload power. The project, which has been ongoing since 2007, is a regional success. It intends to enhance Senegal's power dependability and cost through a "Build, Own, and Operate" model.

How will the Malicounda power plant work in Senegal?

The electricity generated will be fed into the grid through an existing distribution substation. The Malicounda power plant will initially operate on seven Wärtsilä 18V50 engines running on heavy fuel oil (HFO). There is, however, an option to convert the engines to gas operation as soon as gas becomes available in Senegal.

What is the MCC Senegal power compact?

The five-year MCC Senegal Power Compact, comprised of a \$550 million grant investment between the Government of the United States and Senegal, along with a \$50 million supplemental investment from the Government of Senegal for a total \$600 million program, will work in partnership to address these significant constraints to economic growth.

When will West African energy open a gas power station in Senegal?

West African Energy, a Senegalese energy company, plans to open Senegal's

first and largest 300 MW combined cycle gas power station in January 2024.

What is Wärtsilä doing in Senegal?

With 450 MW of installed capacity in Senegal, Wärtsilä is the country's leading provider of power generation equipment. The Matelec company placed an order for the delivery of an energy efficient 130 MW Flexicycle™ power plant. This investment will enable Senegal to achieve its goal of reducing consumer electricity pricing.

Compact power station factory in Senegal
