Container cooling generator

Overview

Which generator sets are best for refrigerated container units?

The most rugged, dependable and easy-to-operate generator sets for refrigerated container units. Carrier's industry-leading PowerLINE Generator Sets are designed and built for continuous, unattended operation for all refrigerated containers transported by road or rail worldwide.

What are the different types of generator cooling systems?

Each generator set manufacturer offers different cooling system design options. The two most common types are closed-loop and open-loop systems. Closed-loop systems incorporate pumps, fans, and radiators located on a skid, creating an all-in-one unit, with container and trailer options also available.

What is a container genset?

Container gensets mitigate this risk by providing a consistent power supply, even in remote or challenging locations. For example, frozen shipping containers rely heavily on these gensets to maintain ultra-low temperatures during transit.

What is a Thermo King generator set?

Thermo King's generator set (genset) range provides the vital, independent power supply needed to maintain the cold chain in global container refrigeration. They provide dependable power after your marine containers are unloaded and unplugged from the ship, ready to continue their journey on the road or waiting for further transport on shore.

What is a genset on a reefer container?

The Genset, also known as a Clip On Generator, is a handy unit that clips onto the chassis of a Reefer Container to provide power when an external source of power is not available, such as during transport. Our Gensets run on diesel, gasoline or gas. Disc type radial fan for cooling: Sealed large diameter rear

bearing.

Why should you choose a container genset?

Portability: Container gensets can be easily attached and removed, allowing for seamless integration into various transport modes. Reliability: Designed for continuous operation, they ensure an uninterrupted power supply for reefers.

Container cooling generator

FLEXIBLE SETTING OF MULTIPLE WORKING MODES

A World Leader in Container Refrigeration

With Carrier Transicold's Micro-Link ® 5 Controller, personnel can now interface with equipped refrigerated containers without any contact with the unit itself.
