Container generator box

Overview

What is a genset container?

The definition of a genset container is an engine that drives the generator, which provides the power used to run other equipment. Depending on the application, the genset may run construction equipment, appliances, cooling systems or other devices. Each genset consists of two main components, the generator – or alternator – and the engine.

What is a containerized generator enclosure?

Our containerized generator enclosures are built to be highly mobile, allowing you to easily transport and relocate your generator equipment as needed. The modular design enables quick assembly and disassembly, making it an excellent choice for temporary power needs or projects requiring frequent relocation.

What is a generator connection box?

The Generator Connection Box is used in conjunction with a transfer switch to provide a convenient, quick connect option for emergency power. These systems feature a NEMA 4/12 enclosure and are capable of handling a range of 400 Amps to 2000 Amps.

How do I use a box generator?

The box generator can create a top and the bottom of a box or it can create a cube that is cut with a saw into 2 parts. The boxes can be any dimensions and there are several setting for the kind and number of cuts on the sides. The box generator can also create trays with handles. Click on the Generators icon and then select Box Generator.

What is a generator box made of?

Please Note: The standard generator box is made from checker plate aluminium. Occasionally, a batch of generator boxes are made from either mill

finish or dimple plate aluminium. When ordering a generator box, please confirm which material it is available before you take delivery. Note: This is a cost estimate and not a contract or an invoice.

What is a generator box & how does it work?

These boxes allow you to store and run your generator from the box. With a fully integrated lift up lid that allows easy mounting and removal of your generator, and weatherproof gasket, you'll no longer have to man-handle your generator in and out of your vehicle or van.
