

# **Conventional photovoltaic panel prices**

## Overview

---

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. How much does a solar panel cost?

Average EXW prices from distributors for residential solar panels are reported between €0.125/W and €0.100/W, depending on the volumes. US DDP: The spot price for TOPCon utility-scale modules DDP US rose this week from 0.71% to \$0.284/W.

How much do polycrystalline solar panels cost?

Polycrystalline solar panels, while slightly less efficient than monocrystalline panels, are significantly cheaper at \$0.75 to \$1.50 per watt (W) because they are relatively easy to manufacture.

How much will PV modules cost in 2025?

International PV module prices, driven by Chinese averages, will likely rise from \$0.08/W to \$0.10/W today to \$0.11/W by the end of 2025 and potentially \$0.13/W by 2027, says Clean Energy Associates (CEA), noting that heterojunction and back-contact technologies now make up 12% of global module capacity.

How much does a roof solar panel system cost?

The cost of expanding a roof solar panel system depends largely on the number of solar panels. Typically, homeowners need to pay around \$1000 for the installation (including plans and permits) and then around \$500-\$700 per new panel.

How much do solar panels cost in Europe?

While Germany promotes rooftops and balcony applications, Italy focuses on smaller projects and Eastern Europe drives on bigger size solar installations.

Average EXW prices from distributors for residential solar panels are reported between €0.125/W and €0.100/W, depending on the volumes.

How much do thin film solar panels cost?

Thin film solar panels at \$0.50-\$1.00 per watt have the benefit of being much cheaper than traditional silicon panels but are less efficient compared to monocrystalline and polycrystalline solar panel types.
