# Costa Rica tool lithium battery

## Overview

---

How many batteries are disused in Costa Rica?

Some 1,500 tons of batteries fall into disuse annually in Costa Rica, says Francisco, the company's project manager. While mining multinationals seek to extract lithium from the salt flats of Chile, Bolivia or Australia, in Costa Rica this company innovates with "urban mining" that recycles minerals.

Can a battery be used for urban mining in Costa Rica?

Daniel Rivas, technical manager in charge of batteries at Fortech, said that they are looking to "recover the materials to be able to carry out urban mining" and not have to "go to a mine to do more damage to the environment". Mining is prohibited by law in Costa Rica.

Is mining illegal in Costa Rica?

Mining is prohibited by law in Costa Rica. This Fortech plant "makes Costa Rica a pioneer in Latin America in the valorization of used lithium batteries," notes the German Development Cooperation Agency GIZ. The University of Aachen in Germany estimates that by 2028 the amount of discarded batteries will exceed the recycling capacity in Europe.

How many tons of lithium batteries can a battery collection system process?

The system has been operating since December 2022, with the capacity to process about 1,000 tons of lithium batteries per year. In November 2022, the Pilot Plan for a permanent collection system for exhausted lithium batteries was launched as a result of a partnership between FORTECH and GIZ.

How do lithium batteries work?

When the lithium batteries arrive at Fortech's industrial plant, they pass through a mechanical belt that feeds them into a shredder to generate a scrap of various metals. When these metals are separated in the lab, they result in "blackmass," a grayish powder composed of cobalt oxide, nickel, manganese

and lithium.

How many tons a year can a lithium battery process?

They validated the designs with German universities and built machinery that can recover 98% of the material that makes up the battery. The system has been operating since December 2022, with the capacity to process about 1,000 tons of lithium batteries per year.
