Customizable photovoltaic module prices

Overview

How much does a PV module cost in China?

According to price analysis firm InfoLink: “Since March, the spot price of n-type modules in China has soared from RMB0.7/W to RMB0.73/W. Quotes from leading manufacturers are approaching the RMB0.75/W mark.” The results of the China Datang Group’s 2025-2026 PV module framework. Image: Datang.

How much will PV modules cost in 2025?

On 11 March 2025, the results of the China Datang Group’s 2025-2026 PV module framework purchase tender were announced, with the spot price of n-type modules increasing from RMB0.7/W (US\$0.097/W) to RMB0.73/W (US\$0.1/W), and some modules priced as high as RMB0.75/W (US\$0.11/W).

Why are solar module prices so volatile in 2023?

Importation duties, oversupply, and supply chain costs have led to significant solar module pricing volatility, particularly since the start of 2023. New technology is rapidly evolving improving efficiencies with the market seeking more clarity around the changing prices of solar modules.

Does Platts offer transparent solar module pricing?

Platts, part of S&P Global Commodity Insights, has observed strong interest in transparent solar module pricing following the exponential growth in the manufacture, trade and installation of solar modules, also referred to as solar panels, globally. What solar module prices are assessed?

.

Are solar modules the cheapest source of electricity?

Regarded by the IEA as the cheapest available source of electricity in history, solar modules are set to become one of the most accessible renewable technologies.

Will global photovoltaic (PV) solar additions double by 2028?

The industry is expecting this momentum to continue with global photovoltaic (PV) solar additions forecast to double by 2028, according to IEA.
