Democratic Republic of Congo professional custom cylindrical lithium battery

ESS

Overview

Can the Democratic Republic of the Congo produce lithium-ion battery cathode precursor materials?

London and Kinshasa, November 24, 2021 – The Democratic Republic of the Congo (DRC) can leverage its abundant cobalt resources and hydroelectric power to become a low-cost and low-emissions producer of lithium-ion battery cathode precursor materials.

How much cobalt does the DRC produce?

“The DRC produces about 70 per cent of global cobalt but captures just 3 percent of the battery and electric vehicle value chain.

Why does the DRC rely on hydroelectric power plants?

This is due to the DRC’s proximity to cathode raw materials and heavy reliance on hydroelectric power plants.

How much would a DRC plant cost?

This is three times cheaper than what a similar plant in the U.S. would cost. A similar plant in China and Poland would cost an estimated \$112 million and \$65 million, respectively. Precursor material produced at plants in the DRC could be cost competitive with material produced in China and Poland but with a lower environmental footprint.

Why is the DRC a cost competitive country?

“The DRC’s cost competitiveness comes from its relatively cheap access to land and low engineering, procurement and construction, or EPC, cost compared to the U.S., Poland and China,” said Kwasi Ampofo, lead author of the report and BNEF’s head of metals and mining.

Could Rio be a win for the DRC?

Securing investment from a major Western firm like Rio would be a strategic win for the DRC as it seeks to reduce Chinese dominance in its mining sector. The country is also in preliminary talks with the U.S. government regarding a minerals-for-security deal to support its efforts against a Rwanda-backed rebellion in the eastern provinces.

Democratic Republic of Congo professional custom cylindrical lithium

?New message?Innovative Polymer Battery Solutions

GeB: Your dedicated cylindrical lithium battery manufacturer with 16 years of focus. We provide innovative custom solutions for your unique power requirements.

Lithium battery project in Kinshasa

The Democratic Republic of Congo (DRC) could build its own factory for the local manufacture of batteries for electric vehicles, thanks to its natural resources, notably

Solar lithium ion battery Congo Republic

Can the Democratic Republic of the Congo produce lithium-ion battery cathode precursor materials? London and Kinshasa, November 24, 2021 - The Democratic Republic of the ...

Lithium battery assembly company in the Democratic ...

The Democratic Republic of Congo (DRC) could become a major low-cost and low-emission producer of lithium-ion (Li-ion) battery precursors, says research company
