# Distribution breaker in China in Ukraine

## Overview

---

Are distributed energy resources a solution to Ukraine's power deficit?

Since Russia's full-scale invasion of Ukraine in February 2022, nearly two-thirds of Ukraine's dispatchable power capacity has been occupied, damaged, or destroyed. The report highlights distributed energy resources (DERs) as a vital solution to address their power deficit while enhancing Ukraine's energy security, resilience, and flexibility.

Can a decentralised electricity system empower Ukraine?

Hence, in context of the report Empowering Ukraine Through a Decentralised Electricity System, a pioneering, detailed and bottom-up approach was developed to create a new high-resolution dataset of capacity and generation potential for Ukraine.

How can Ukraine meet its long-term decarbonisation goals?

The move towards a greater level of decentralisation in power generation can also support Ukraine in meeting its long-term decarbonisation goals, as set out in the 2030 National Energy and Climate Plan and the 2050 Energy Strategy.

Can Ders help Ukraine's power system recover?

IEA analysis shows that a diverse mix of DERs offers a cost-effective and resilient path for Ukraine's power system recovery. Urgent actions include deploying small gas turbines and DERs such as solar PV and batteries to address a projected 6 GW winter power deficit in 2024/2025.

How can Ukraine build a more resilient and modern power system?

The roadmap also lays out seven key policy recommendations for Ukraine to build a more resilient and modern power system by establishing a vision for decentralisation and by strengthening regulatory frameworks, coordination mechanisms, electricity markets and relevant technical requirements.

What is Ukraine's energy roadmap?

A roadmap for Ukraine's increased use of distributed energy resources towards 2030. This roadmap from the IEA, *Empowering Ukraine through a Decentralised Energy System*, outlines a pathway to rebuild and modernise Ukraine's power sector amid ongoing attacks on its energy infrastructure.
