

SolarGrid Energy Solutions

Dubai UAE promotes new energy storage

Overview

The UAE has launched what it says is the world's first and largest 24-hour power project, combining solar photovoltaic with battery storage to deliver 1 gigawatt of baseload electricity. Why is energy storage important in Dubai?

"We follow the vision and directives of His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai, to ensure energy security and sustainability. Energy storage is a vital aspect in ensuring energy sustainability and increasing the reliance on clean and renewable energy sources.

Which country has the largest thermal energy storage capacity in the world?

DEWA has the largest thermal energy storage capacity in the world. Reliance on clean and renewable energy sources, especially solar power, is increasing. This is driven by their low cost, in light of the global direction to combat the effects of climate change by reducing gas emissions that cause global warming.

Why is energy storage important?

The main challenge is the efficient storage of this energy to ensure it is available when there is no sunlight or in different weather conditions, emphasising the importance of energy storage technologies.
