

## SolarGrid Energy Solutions

# EU backup UPS uninterruptible power supply

## Overview

---

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) protect the 24 V supply voltage against unexpected power failures. In the BLOCK portfolio, capacitive UPS solutions provide 24 V DC power supply for up to several minutes. Equipped with ultracapacitors, these solutions are designed for long service life and operation in demanding temperature ranges.

Do you need a battery backup or uninterruptible power supply (UPS)?

Everybody understands the frustration that comes with a sudden power cut, destroying hours of unsaved work or internal computer components. A battery backup or uninterruptible power supply (UPS) may be the only solution, providing backup power and protecting your computer hardware from electric surges and spikes.

What is an uninterruptible combined UPS system?

The uninterruptible combined UPS units include an economical 24 V DC switched mode power supply with an integrated charge and control unit for optimal battery management. These space-saving combined UPS systems control and monitor the connected battery modules, providing early warnings when battery life expectancy is low.

What is a capacitive ups based on ultracapacitors?

The capacitive UPS based on ultracapacitors provide the highest level of system availability in the field of 24 V DC uninterruptible power supplies. With a broad portfolio designed for various requirements and applications, they ensure uninterrupted power supply with currents of up to 40 A in the event of a power failure.

Why should you choose a battery UPS system?

Battery UPS systems ensure maximum system availability through intelligent

battery management and short charging times – even with large battery capacities. The charge and control units with integrated decoupling reliably protect your systems against failures, ensuring a continuous DC power supply.

What are the components of a power supply?

Control Components Uninterruptible Power Supplies (UPS) Temperature  
Controllers & Sensors Energy Monitoring Devices Power Supplies Condition  
Monitoring Devices Uninterruptible Power Supplies (UPS) Digital Panel  
Indicators Electronic Circuit Breaker Programmable Relays Timers Process  
Sensors Counters Axial Fans Uninterruptible Power Supplies (UPS)
