Eastern European polysilicon photovoltaic panel manufacturers

Overview

How many companies in Europe manufacture solar PV modules?

Today, at least 38 companies are active in Europe manufacturing the equipment and machinery that produces vital steps of the solar PV module supply chain, including cells, ingots, wafers, and polysilicon. EU Clean Industrial Deal: Opportunity for renewables and European manufacturing.

What is the EU solar manufacturing map?

The EU Solar Manufacturing map gives an overview of solar manufacturing companies active along the solar PV chain. On this map, you'll find manufacturers spanning from polysilicon to module as well as the aggregate production capacities for each segment.

Who are Europe's leading solar manufacturers?

In the following section, we provide an overview of 59 leading manufacturers, all of which are contributing significantly to Europe's renewable energy landscape. From established companies such as Primroot.com and HUAWEI to innovative newcomers, these manufacturers represent the cutting edge of solar technology.

What does the new EU report 'solar production equipment' mean for solar PV?

The new report „Solar Production Equipment – Key players in the EU's industrial ecosystem for solar PV“ explores the European capacity to manufacture the equipment and machinery that produces at each stage of the solar module manufacturing process.

How many solar panel manufacturers are there in Europe?

Europe is home to a large number of world-class solar panel manufacturers. In the following section, we provide an overview of 59 leading manufacturers, all of which are contributing significantly to Europe's renewable energy landscape.

Are solar panels made in Europe certified?

All solar panels made in Europe are required to carry this certification. This certification, developed by the International Electrotechnical Commission (IEC), specifies test procedures to assess the performance of crystalline silicon terrestrial photovoltaic (PV) modules under natural sunlight.
