Energy Storage Battery Sales in East Africa

Overview

The Report Covers East Africa Battery Market Analysis and it is Segmented by Type (Primary Battery and Secondary Battery), Technology (Lithium-ion Battery, Lead-acid Battery, and Other Technologies), Application (Industrial Batteries, Portable Batteries, and Other Applications), and Geography (Kenya, Ethiopia, Tanzania, and Rest of East Africa). Are battery energy storage systems developing in Africa?

Confirmed development of Battery Energy Storage Systems (BESS) across Africa is still small compared to global projections, says a study. The confirmed development of Battery Energy Storage Systems across Africa is still small compared to global projections – less than 0.5% of the global BESS capacity of 358GW by 2030.

Does Scatec have a solar-plus-storage site in South Africa?

Scatec's Kenhardt solar-plus-storage site in South Africa (above), which went online at the end of 2023. Image: Scatec. Africa's energy storage market has seen a boom since 2017, having risen from just 31MWh to 1,600MWh in 2024, according to trade body AFSIA Solar's latest report.

Are energy storage boom times extending to Africa?

Boom times for energy storage have extended to the continent of Africa, with a 10-fold increase in installed storage supporting grids and renewable energy penetration.

What are the most popular solar-plus-storage developments in Africa?

As noted by AFSIA Solar, one of the most notable solar-plus-storage developments in Africa is Norway-based independent power producer (IPP) Scatec's 225MW/1,140MWh Kenhardt project in South Africa. The site started operation in late 2023 (pictured above).

How many GWh of storage projects are being built in Africa?

AFSIA said similar projects have also been launched in Senegal, Malawi, Botswana, Tanzania, Namibia and Mauritius, for a total of 500 MW plus. In total, AFSIA says around 18GWh of storage projects are under development across Africa. Tristan is an Electrical Engineer with experience in consulting and public sector works in plant procurement.

How long do lithium-ion batteries last?

It further says that lithium-ion batteries are currently dominating the global market, delivering up to eight hours of storage and showing minimal degradation over 10 years. “But other technology options are emerging fast that could cater more cost-effectively for evolving system requirements.
