## Overview

---

What is TE Connectivity's battery energy storage system (BESS) solution?

TE Connectivity's (TE) Battery energy storage system (BESS) solutions, which improves power allocation flexibility in power generation, power transmission, and power consumption, help meet this increased demand for alternative energy sources.

How can Honeywell energy storage solutions improve energy resilience?

Honeywell energy storage solutions can enhance energy resilience by providing a reliable backup power source during outages and stabilizing operations during peak demand periods.

Why should you invest in energy storage solutions?

Solutions that can support you improving your energy storage operations, empower your workforce with advanced tools and provide actionable insights and visualization to enhance efficiency and help you achieve your energy storage goals. Technologies to help expand the supply of sustainable aviation fuel.

Why do power plants need TE Connectivity Solutions?

TE's connectivity solutions that can resist in harsh environments such as extreme temperatures, high voltage and current shocks, provide for fast and reliable switching capability, empowering a high degree of smart and intelligent operation and maintenance in power plants.

What is a data center power solution?

A Data Center is an entire unit including a server room that ensures the continuous operation of servers and their ongoing maintenance. Class-leading data center power solutions will keep your operations running 24/7. They're space-saving, time-saving, energy-saving, cost-saving and infinitely scalable.

How can Honeywell help you build a reliable energy supply?

Honeywell can help you build the infrastructure to support various energy sources to support your organization's energy supply. By seamlessly integrating renewable energy sources and enhancing energy optimization, we can help you deploy a reliable and cost-effective power supply.

 Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT trackers, 100W DC Input Overlimit
- Max. PV Input Current 15A, Compatible with High-Power Modules

 Intelligent Simple O&M

- IP65 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

 Flexible Abundant Configuration

- Plug & Play, EPS Switiching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
