

**SolarGrid Energy Solutions**

# **Energy Storage Group New Energy**

## Overview

---

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Where is Yingcheng energy storage station?

An aerial drone photo taken on April 9, 2024 shows a view of the 300 MW compressed air energy storage station in Yingcheng, central China's Hubei Province. (Xinhua/Cheng Min) BEIJING, May 24 (Xinhua) -- U.S. carmaker Tesla broke ground on a mega factory in Shanghai on Thursday to produce its energy-storage batteries Megapack.

Should energy storage be removed from energy grid connection?

For energy storage, the new Chinese policy emphasized the need to remove energy storage as a prerequisite for renewable energy project grid connection, a requirement that has been a major driver for battery build. Nonetheless, BNEF still expects strong demand for batteries, as the policy doesn't explicitly require mandates to stop.

What is the demand for energy storage facilities in China?

The rapid growth of renewable energy generation has created a large market demand for energy storage facilities. By the end of the first quarter of 2024, the cumulative installed capacity of new energy-storage projects in China had

reached 35.3 million kW.

Can new energy storage promote green and low-carbon development?

This year's government work report noted the development of new energy storage as one of the measures to promote green and low-carbon development. New energy storage refers to energy-storage technologies other than conventional pump storage. It offers advantages such as a short construction period, flexible layout and fast response.

## Energy Storage Group New Energy
