What is an energy storage project?

An energy storage project is a cluster of battery banks (or modules) that are connected to the electrical grid. These battery banks are roughly the same size as a shipping container. These are also called Battery Energy Storage Systems (BESS), or grid-scale/utility-scale energy storage or battery storage systems.

Where are the energy storage projects being built?

The energy storage projects will be located at three existing SCE power substations: 225 MW at Springvale Substation in Big Creek-Ventura, 200 MW at Hinson Substation in the Los Angeles Basin, and 112.5 MW at Etiwanda Substation in the Los Angeles Basin.

What did Universal Energy do at cop29?

1□During the 29th United Nations Climate Change Conference (COP29), Universal Energy competed alongside eight global renewable energy leaders from Saudi Arabia, the UAE, Turkey, the U.S., and other countries, leveraging its strengths to secure the bid for a 100MW solar power project in Azerbaijan.
