# **Fire protection regulations for communication base station and wind power buildings**

Sample Order  
UL/KC/CB/UN38.3/UL

## Overview

---

What fire protection standards are included in building design codes?

Moreover, corresponding fire protection standards are also included in specific building design codes, such as the Code for the design of railway passenger stations (TB 10100), the Architectural technical code for hospital clean operating departments (GB 50333) . . . . . 4.

Who should implement the fire protection work responsibility system?

Local people's governments at various levels should implement the fire protection work responsibility system, and supervise and inspect the performance of fire safety duties by relevant departments of people's governments at the corresponding levels.

What are fire protection standards?

Regarding the standard category, it can be divided into engineering and product standards. The code for the fire protection design of buildings (GB 50016) is the basic technical standard for fire protection engineering, which is also the first general specification in the field of building fire protection in China, covering a wide range of areas.

Do wind turbines need fire protection?

Fire protection requirements on wind turbines refer to the overall system and take into account the system-specific main areas of risk at the rotor blades, in the nacelle (machine house), in the tower, or at the premises. Depending on the kind of risk, different fire protection measures might be required.

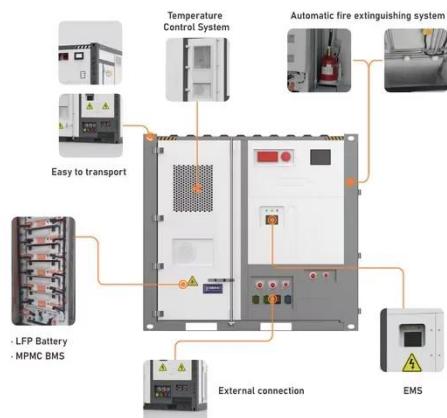

What are fire protection facilities?

The meanings of the following terms in this Law: (1) Fire protection facilities refer to automatic fire alarm systems, automatic fire extinguishing systems, hydrant systems, smoke and smoke exhaust systems, emergency broadcasting and emergency lighting, and safety evacuation facilities.

What are the regulations for fire control work on forest and grassland?

For fire control work on forest and grassland, in case there are separate regulations, the separate regulations shall be followed. Article 5 Any unit and individual shall have the obligation of keeping fire control safety, protecting fire control facilities, preventing fire disaster and reporting fire alarm.
