French photovoltaic module solar factory

Overview

Why is Das solar launching a French factory?

Marking the 60th anniversary of diplomatic relations between China and France, the launch of DAS Solar's French factory is more than just an investment—it is a symbol of global cooperation and a model of synergy between Chinese innovation and European manufacturing.

Where will a 3 GW solar module assembly factory be built?

From pv magazine France Chinese solar module manufacturer DAS Solar plans to build a 3 GW solar module assembly factory in Mandeure, a commune in Doubs department in the Bourgogne-Franche-Comté region of eastern France.

What will das Solar do in France?

Looking ahead, DAS Solar plans to establish additional facilities for ingot and wafer production in France. Alongside partner companies, it also aims to localize production of key solar materials and components—including EVA/POE, cables, junction boxes, aluminum frames, and silver paste—forming a comprehensive “Made in France” solar supply chain.

When will das solar start operating in France?

The company aims to apply for a building permit in May 2025, begin construction in October 2025, and start operations in 2026. Das Solar said on April 11 that it had signed its first two agreements in France: one with Suez to reprocess end-of-life solar panels, and another with the Île-de-France Photovoltaic Institute for technological development.

When will das solar open its first European PV panel assembly plant?

Chinese manufacturer Das Solar says it will open its first European PV panel assembly plant in Mandeure, eastern France, by the end of 2025. From pv magazine France.

What is PV moduletech Europe 2025?

PV ModuleTech Europe 2025 is a two-day conference that tackles these challenges directly, with an agenda that addresses all aspects of module supplier selection; product availability, technology offerings, traceability of supply-chain, factory auditing, module testing and reliability, and company bankability.
