

SolarGrid Energy Solutions

Greek energy storage battery manufacturers

Overview

Can a battery storage plant be built in Greece?

An increasing number of local and foreign companies are interested in building energy storage facilities in sun-loving Greece using battery technology. In fact, the Regulatory Authority for Energy (RAE) has been receiving applications for permits concerning battery storage plants.

Why is Greece launching a battery storage auction?

Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license.

Does Greece have a battery storage pipeline?

Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started, with the first projects being awarded support for both investment and operating costs.

Which companies are investing in batteries in Larissa?

Enel Green Power is another large company that has already included batteries in two renewable energy projects in Larissa – 83.7 MW and 50 MW. “Although Greece did not take timely steps and the regulatory framework is delayed, we are proceeding with innovative investments in storage,” according to its head for Europe Aristotelis Handavas.

Which companies are planning a 100 MW battery storage project in Macedonia?

Public Power Corp. (PPC) has also set its sight on storage and recently

received a permit for a 100 MW project in Ptolemaida in Western Macedonia. Other companies include Magna Victoria, Melven, Mars BESS and MS Komotini, which have already received permits for a combined 400 MW of battery capacity in various large projects.

Why does Greece need gas storage?

The need for storage in Greece will accelerate rapidly over the next decade as renewables targets are revised upwards and coal plants are closed. The pivot to gas, a core part of the country's energy strategy just a couple of years ago, has been upended by the disruption to supplies and price volatility caused by Russia's invasion of Ukraine.

Greek energy storage battery manufacturers

Greece awards 411MW of battery storage ...

Aug 14, 2023 · The Regulatory Authority for Energy of Greece has chosen the 12 winning projects of a battery storage tender with 411MW awarded aid.

Greece's Sunlight abandons its gigafactory plans

Jan 23, 2025 · Greece's leading battery energy storage business, Sunlight, has agreed to acquire 51% of Lehmann Marine GmbH, a German company that supplies the marine industry with ...

Greece postpones third battery storage auction

Dec 17, 2024 · Greece has cancelled its third large-scale energy storage auction, after a lack of understanding over its rules on power capacity limits.
