Haiti Outdoor Power Plant

Overview

Why did Haiti shut down Péligre Hydroelectric Plant?

Residents of Mirebalais shut down Haiti's Péligre hydroelectric plant to protest gang control, triggering blackouts amid a growing fuel crisis. The Péligre hydroelectric dam, built on the vast Artibonite River, is located near Mirebalais in the Centre Department and has long served as the country's main source of electricity.

What happened to EdH power plant in Haiti?

A view of the Electricity of Haiti (EDH) power plant in Delmas 33, also supplied by the Péligre hydroelectric center, but now shut down, on Friday, May 16, 2025. Photo by Dieugo André for The Haitian Times.

How much electricity does Haiti have?

The capital's poorest residents cannot afford either alternative. With a capacity of 54 megawatts (MW), Peligre provides nearly all of EDH's 60 MW of hydroelectric power, Haiti's largest source of electricity after fossil fuels. Just 49% of people in the Caribbean nation have access to the electricity grid, according to the latest World Bank data.

How does Péligre HPP contribute to Haiti's energy supply?

After completion in the 1970s Péligre HPP contributed to Haiti's energy supply with an annual production of 320 GWh, stemming from an average power of 47 MW during the rainy period (May to November) and 22 MW during the dry period (December to April).

Does the Inter-American Development Bank support Haiti's Electricity sector?

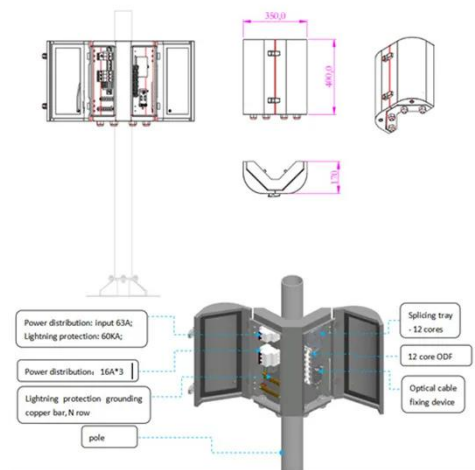

In this context, and as part of its strategy to support Haiti's electricity sector, the Inter-American Development Bank (IDB) financed technical studies conducted by an international consultant to set out a detailed rehabilitation plan and prepare tender documents on the basis of the conclusions of the

2008 sedimentation study.

Are fuel shortages threatening Haiti's energy crisis?

As Haiti's energy crisis deepens, fuel shortages threaten to make things worse. On May 13, the Association of Petroleum and Energy Professionals (APPE) warned in a letter to Prime Minister Fils-Aimé of an imminent breakdown in the fuel supply chain.
