How do I choose a Bess supplier?

Jeff Zwijack outlines key factors in selecting BESS suppliers, focusing on quality, warranties, and strategic partnerships for long-term success.

Where is Bess located?

1. Address: 1F, Building 2, No. 1876, Chenqiao Road, Fengxian District, Shanghai, China 2. Phone: 008613816499542 3. Email: [email protected]  
China's leading BESS company, dedicated to developing the best battery energy storage system and improve the efficiency of renewable energy storage.

Does Bess have a quality control process?

Analysis of BESS manufacturing issues and defects conducted by Clean Energy Associates reveals that about 30% of faults originate during battery cell manufacture. System-level defects accounted for almost 50% of our findings. Compared to the cell-manufacturing process, BESS integration has fewer quality control procedures.

Why is Bess integration better than cell-manufacturing?

Compared to the cell-manufacturing process, BESS integration has fewer quality control procedures. We have encountered numerous problems with thermal management systems. In liquid-cooled systems, coolant can leak due to deformed flange plates, defective valves, and loose pipe connections.
