# High temperature of outdoor base station

## Overview

---

Are passive cooled base stations effective?

Abstract—Passively cooled base stations (PCBSs) offer low deployment cost and energy consumption for the next generation networks. By its nature, however, dealing with the thermal issue becomes crucial. For an outdoor PCBS, a major challenge is that the heat dissipation is uncertain over time.

What is the temperature of a mobile communication base station?

(1) is 38.5 °C, which is lower than 40 °C, and meets the temperature control requirements of GB/T 51216 2017 "Technical Standard for Energy Conservation in Mobile Communication Base Station Engineering".

What is the energy saving rate of communication base station cooling system?

In the outdoor daily temperature range of 24–28 °C, 28–32 °C, 32–36 °C, 36–40 °C, the energy saving rate of the unit is 67.3 %, 65.2 %, 39.6 %, 6.9 %, respectively, which reduces the energy consumption of the communication base station cooling system to different degrees. Fig. 11. Average power and energy saving rates for different temperature ranges.

What is a composite cooling unit for communication base station?

In order to solve the outstanding problems of communication base station, a composite cooling unit of heat pipe and vapor compression air conditioner for communication base station was developed.

Does BBU meet the temperature control requirements?

The unit was applied to a communication base station in Zhengzhou to conduct the field test. The results showed that BBU in the cabinet met the temperature control requirements of relevant standards under short-term high temperature and extreme high temperature conditions. There was no high temperature alarm.

Can air distribution improve the temperature control effect of communication equipment?

The air distribution in the cabinet can be further optimized to improve the temperature control effect of communication equipment and reduce the energy consumption of cooling system. This study has certain reference value for temperature control of communication equipment and energy saving of base station cooling system. 1. Introduction

## High temperature of outdoor base station

### STUDY ON AN ENERGY-SAVING THERMAL ...

May 17, 2024 · unication base stations has become one of the important ways to save energy. Practical applications showed that the outdoor communication base station has a high ...
